

Trinetra Ambulance Tracking System

Ambulances are probably one of the most essential vehicles people rely on in times of need. GPS tracking systems are definitely one of the most functional upgrades many ambulances across the globe have used to better modernize ambulances. Optimum dispatching of appropriate ambulances ensures prompt emergency services and allows for timely patient transport.

Trinetra's Ambulance Tracking System offers the emergency response crew to accurately monitor the location of their emergency vehicles helping them to save precious time in an emergency by directing the closest vehicle to the incident.

Solution Offerings

- Find the nearest ambulance to a patient's location
- Locate the nearest hospital from the ambulance
- Cut response times in the "Golden Hours"
- Accurately verify patient transport times & mileage
- Effectively verify driver / ambulance locations
- Re-route the ambulance to the nearest hospital
- Monitor siren & light activations
- Optimize routes to patient locations
- Monitor non-emergency speeding to improve driver safety
- Ensure drivers are at assigned staged locations
- Keypad integration to monitor all important events

Key Benefits

- Improved response times
- Attend to emergencies on time
- Better planning & customer service
- Effective fleet monitoring
- Accurate vehicle status updates
- Maximized productivity
- Reduced operational costs

Trinetra offers comprehensive solutions for your business challenges in Vehicle Tracking and Fleet Management by integrating all 3 core elements of AVL solutions namely **Location, Tracking & Security**.

Trinetra is an award winning product that uses industry leading web technologies and cutting-edge hardware design to bring you the highest quality of GPS Vehicle Tracking and Fleet Management Solutions.

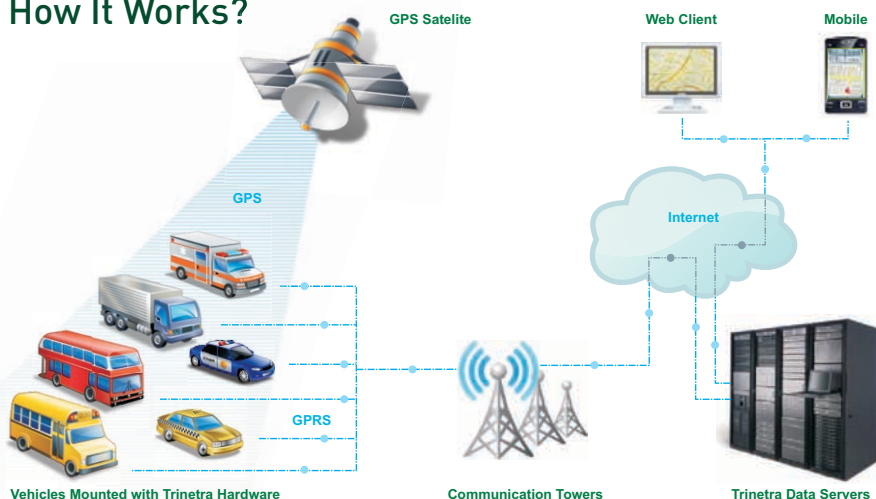

Key Features

- Vehicle Tracking
- Digital Mapping
- Graphical Dashboard
- Extensive Reports
- Fleet Maintenance
- Driver Management
- Route Optimization
- Notification & Alerts
- Temperature Sensing
- Mobile Data Terminal
- RFID Integration
- Enhanced Security

Unique Advantages

- Integrated GPS Hardware & Software
- Fully Hosted Cloud Computing Solution
- Real Time Position Information
- Sensor Integration
- Geozones & Custom Landmarks
- Proprietary Protocol
- Multilingual Support
- Multi Map Support

How It Works?

Trinetra Wireless is an innovative technology company with proven domain expertise, an advanced hardware design centre in Canada, a world-class embedded engineering and software development centre in India.

With local presence in 8+ global locations, we also work in partnership with channel partners and system integrators worldwide to provide quality solutions to our clients.
